

METAPUR

Care product for stainless steel

Composition:

METAPUR contains: 5-15% non-ionic surfactants, more than 30% aliphatic hydrocarbons, methylchlorisothiasolinone, methylisothiasolinone.

pH-value: approx. 6.

Performance:

Excellent care product for stainless steel and anodized metal. Cares, polishes and protects metallic and anodized surfaces in one operation. Quickly and completely removes light surface stains or marks, such as finger marks, discoloration, clouding and spotting. METAPUR delivers a non-streaky, shiny appearance without leaving an oily film. Without abrasive or polishing agents, hence no risk of scratching. The care ingredients contained in METAPUR give the metal surface lasting protection against finger marks, water stains and dust and thus delay the resoiling that generally occurs. It also delays metal oxidation and discoloration. No unpleasant odor during or after application. Acid and alkali-free. The bottleneck grip sits comfortably in the hand, making it easy and safe to use. Used sparingly (2-4ml per m²).

Application notes:

Can be used on all metal surfaces (except kitchen sinks) such as stainless steel, anodized aluminum and brass. Ideal for steel furniture and paneling, counters, doors, lifts, moldings, window frames and chrome-plated fittings. Not suitable for kitchen sinks.

Usage:

Shake METAPUR before use with the spray nozzle closed. Keep the bottle upright, turn the spray nozzle to "Spray" and spray sparingly onto the surface from a distance of about 20cm. Immediately spread METAPUR out evenly with a soft, lint free cloth and rub dry. For large areas, it is better to spray onto a dry, non-fluffy cloth instead and use it to rub the metal surface thoroughly. High-shining steel and chrome surfaces should be polished up with a dry cloth. Use very sparingly because METAPUR is extremely rich.

Precaution for use:

Do not use METAPUR on floorings, on car pedals (risk of slipping) or on wet or damp metal surfaces.

Ecology:

This product is subject to regulations governing the environmental compatibility of washing and cleaning agents and the associated regulations on the biological degradability of the raw materials used.

Comprehensive information about the environmental characteristics of this product is available on request.

Give only completely packaging to special waste disposer.

This product is designated for industrial use.
